Pump Excellence

Reaching Great New Heights

Cyclone Industries is a company dedicated to serving the Mining, Industrial, Power Generation, Pharmaceutical, Food & Beverage industries with specialised Pumps, Sealing Systems, and associated products. We supply and service South Africa as well as African countries.

First established in 1986 and based in Germiston, South Africa, **Cyclone Industries** has grown into a multi-faceted company, importing the highest quality pump and sealing products, pump system design and fabrication, after sales service and pump repairs.

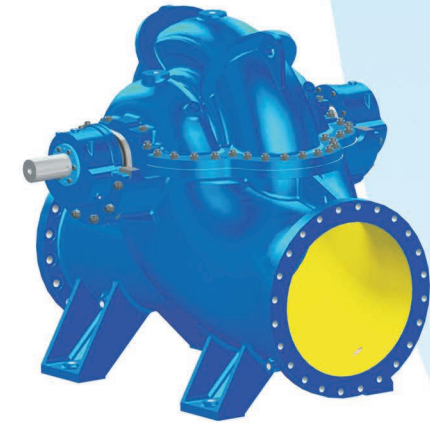

Our dynamic sales team work directly with production & planning to ensure that our client needs are met to exact specifications, all while keeping within required delivery dates. We continuously strive to maintain high quality standards in our workshop facility, whilst all our products carry manufacturer's quality standards and certification.

Cyclone Industries Pump Range

We are proud to represent world leading brands in the pump industry. Products that fill the needs of every application within ever changing environments.

- Dosing Pumps
- Progressive Cavity Pumps
- Dewatering Pumps
- Submersible Pumps
- Vertical Spindle Slurry Pumps
- Medium & Heavy Duty Slurry Pumps
- Chemical Process Pumps

- Sanitary Pumps
- Rotary Lobe Pumps
- Centrifugal Water Pumps
- Multistage Pumps
- Self-Priming Pumps
- Pontoon Mounted Dewatering Pumps
- Horizontal Split Case Pumps
- Air-Powered Diaphragm Pumps
- Water & Slurry Valves

Cyclone Sealing Systems

Providing efficient sealing solutions remains a huge focus point here at **Cyclone Sealing Systems**. We are official distributors for the Chesterton range of mechanical seals, gland packing and seals within Gauteng, Western and Northern regions of South Africa.

Chesterton is at the forefront of developing technology and solutions that impact process efficiency, regulatory compliance, and reduced energy consumption.

ARC Composite Coatings / Anti-Corrosive & Anti-Abrasive

Cyclone Sealing Systems specialises in coatings that meet the needs in process industries where chemical attack, aggressive corrosion and severe abrasion occurs. ARC Efficiency & Protective Coatings is a product range of Chesterton designed to protect the original substrate whilst enhancing performance of equipment.
